# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- This report is based on Stack Overflow's annual Developer Survey.
- Python and SQL are growing in popularity.
- JavaScript maintains its position.
- SQL-based databases remain popular.
- Amazon Web Services (AWS) is the top platform preferred by developers.
- Node.js and React are the top two web frameworks preferred

# INTRODUCTION

---

- The survey includes around **65K developers** from diverse backgrounds and countries.
- The survey focuses on programmers' choices of language, platform, and web framework for both the current and next year, along with their demographic background, work modules, and education levels.
  - Most programmers are from the **U.S.** and aged around **25-34**
  - The most frequent work module is **hybrid**, followed by **remote**.
  - The second most common education level is **some college degree**, but there are developers from lower educational backgrounds as well.
  - Most developers are satisfied with their work, regardless of work module.

# METHODOLOGY

---

- Collect survey data and describe
  - Web Scraping & APIs
  - Python Libraries
- Cleaning the data to analyze using Pandas
- Analyzing data distribution.
  - Using Python Libraries and IBM Cognos
- Data Visualization:
  - Python Visualization Libraries
  - IBM Cognos
- Dashboards are created with IBM Cognos

# PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

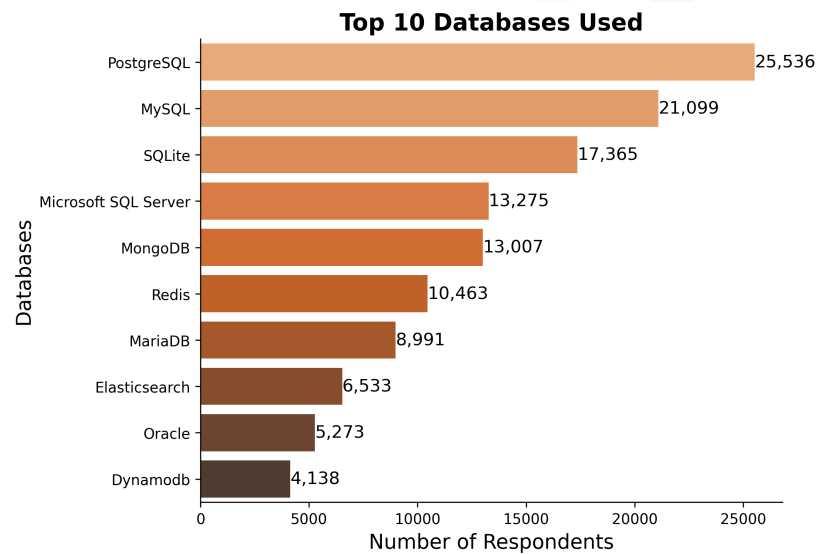

- **JavaScript** is the most popular language among current languages.
- **Python** seems poised to replace it soon in the rankings.
- **C** and **C++** appear to be the least popular languages in the list.

## Implications

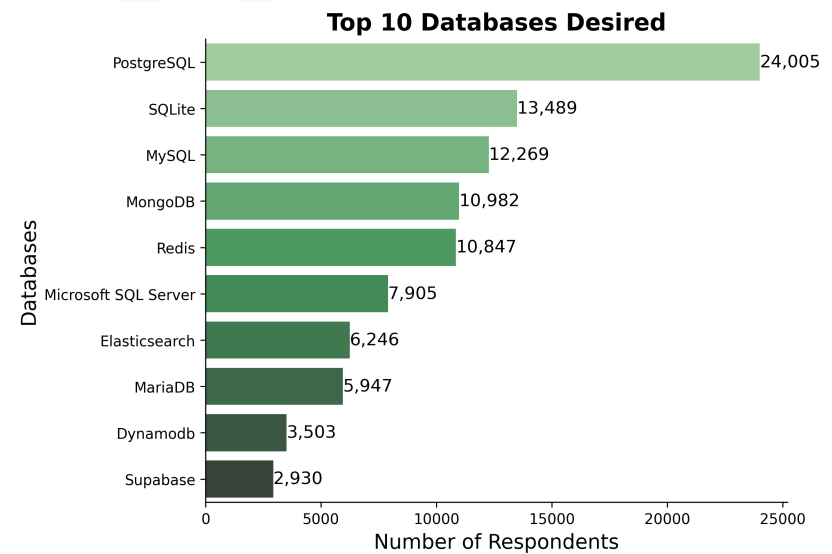

- **JavaScript's dominance** suggests it will remain crucial for web development.
- **Python's growth** signals a shift towards data science and automation.
- **Declining interest in C/C++** points to a shift towards higher-level languages in development and education

# DATABASE TRENDS

## Current Year

## Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- **PostgreSQL** maintains its position in both the current and future years.
- **Oracle** loses ground in the competition.
- **MongoDB** gains popularity.

## Implications

- Users are increasingly adopting **SQL-based databases**.
- **Python** and **SQL** should integrate more effectively.
- Firms should adjust themselves to new changes,

# RESULTS

---

[Dashboard Link](#)

# CURRENT TECHNOLOGY TRENDS

Top 10 Programming Languages

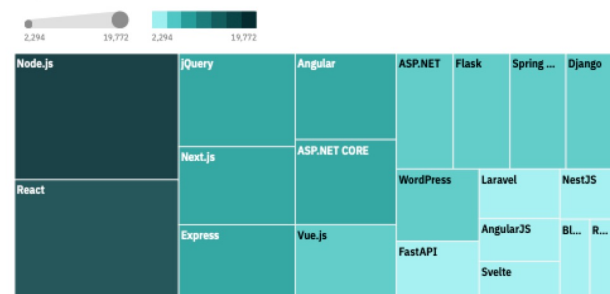

Top 10 Data Bases

Top 10 Platform Used

Top 20 Web Framework

# FUTURE TECHNOLOGY TRENDS

Top 10 Programming Languages

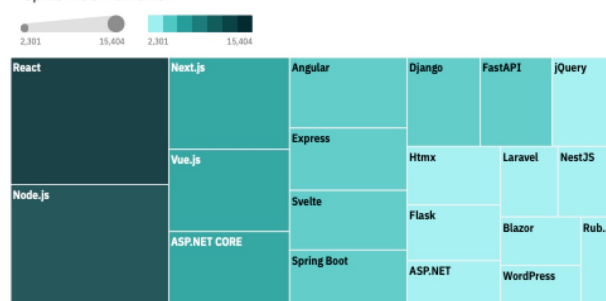

Top 10 Data Bases

Top 10 Platform Used

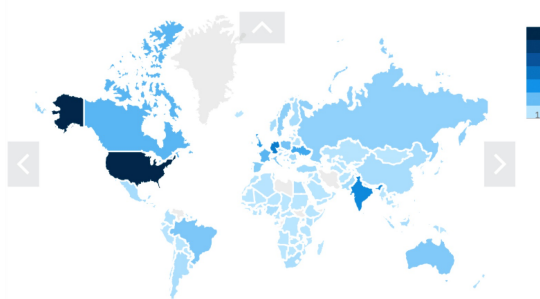

Top 20 Web Framework

# DEMOGRAPHICS

Location Distribution

Education Level

Age Distribution

Type of Work

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

---

## Technology Trends Findings

- **JavaScript** remains the most popular language, but **Python** is growing rapidly, especially among juniors.
- **C** and **C++** are declining in popularity.
- **PostgreSQL** maintains its position in both current and future years.

## Implications

- **Python's** rise indicates a growing shift towards **data science** and **automation**.
- The decline in **C/C++** suggests a move toward higher-level languages in both **development** and **education**.
- The widespread adoption of **SQL-based databases** is evident, with **PostgreSQL** and **MongoDB** gaining momentum.

# OVERALL FINDINGS & IMPLICATIONS

---

## Job Market Findings

- **Washington, D.C.** offers the most developer opportunities.
- **Swift** leads in salaries, followed by **Python**.
- Developers are largely **satisfied with their work**, independent from work **environments being remote or not**.

# CONCLUSION

---

- Integration between **Python** and **SQL** will become increasingly important for businesses.
- Firms should adapt to the growing shift towards newer database technologies.

# APPENDIX

---

- Include any relevant additional charts, or tables that you may have created during the analysis phase.

# JOB SATISFACTION (SURVEY DATA)

Job Satisfaction Distribution for Remote

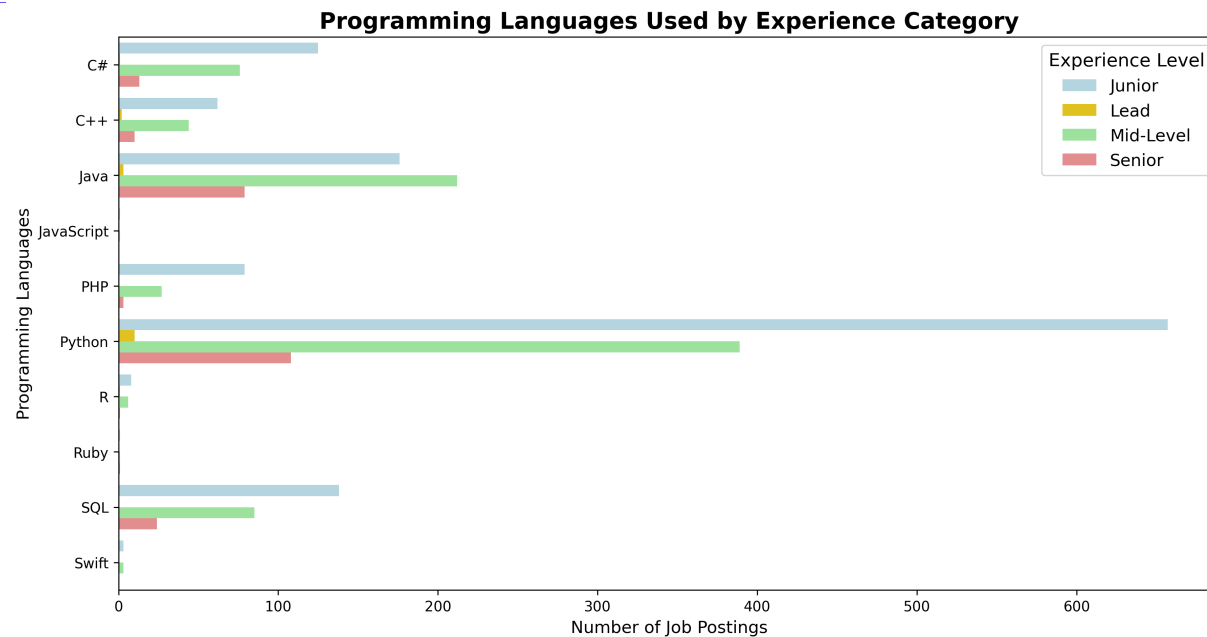

Job Satisfaction Distribution for In-person

Job Satisfaction Distribution for Hybrid (some remote, some in-person)

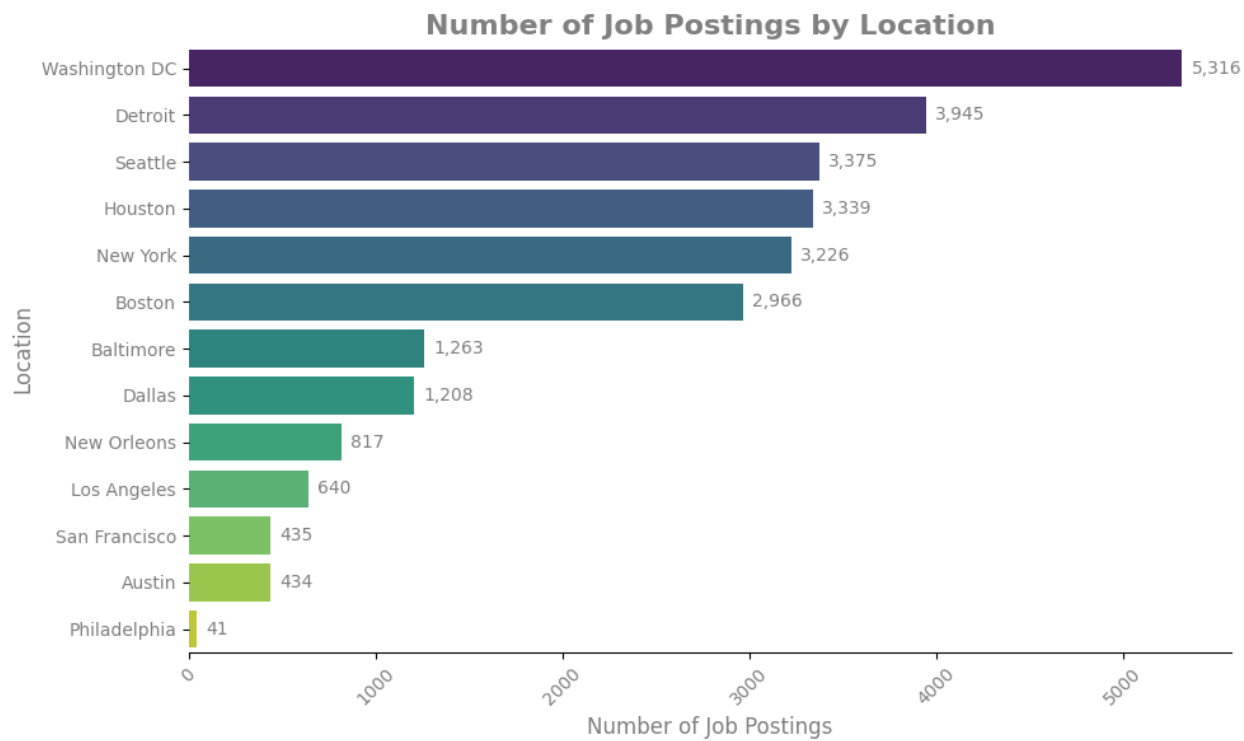

# JOB POSTINGS

Junior: 0 - 3 years  
Mid-Level: 4 - 7 years  
Senior: 8 - 12 years  
Lead: 13 - 18 years  
Expert: 19+ years
